"SEC. 301. DEFINITIONS

"In this chapter:

"(1) Human cloning. The term 'human cloning' means human asexual reproduction, accomplished by introducing nuclear material from one or more human somatic cells into a fertilized or unfertilized oocyte whose nuclear material has been removed or inactivated so as to

produce a living organism (at any stage of development) that is genetically virtually identical to an existing or previously existing human organism.

"(2) Asexual reproduction. The term 'asexual reproduction' means reproduction not initiated by the union of oocyte and sperm.

"(3) Somatic cell. The term 'somatic cell' means a diploid cell (having a complete set of chromosomes) obtained or derived from a living or deceased human body at any stage of development.

"SEC. 302. PROHIBITION ON HUMAN CLONING

"(a) In General. It shall be unlawful for any person or entity, public or private, in or affecting interstate commerce, knowingly—

"(1) to perform or attempt to perform human cloning;

"(2) to participate in an attempt to perform human cloning; or

"(3) to ship or receive for any purpose an embryo produced by human cloning or any product derived from such embryo.

"(b) Importation. It shall be unlawful for any person or entity, public or private, knowingly to import for any purpose an embryo produced by human cloning or any product derived from such embryo.

"(c) Penalties.

"(d) Scientific Research. Nothing in this section restricts areas of scientific research not specifically prohibited by this section, including research in the use of nuclear transfer or other cloning techniques to produce molecules, DNA, cells other than human embryos, tissues, organs, plants, or animals other than humans."

- (1) a discussion of new developments in medical technology concerning human cloning and somatic cell nuclear transfer, the need (if any) for somatic cell nuclear transfer to produce medical advances, current public attitudes and prevailing ethical views concerning the use of somatic cell nuclear transfer, and potential legal implications of research in somatic cell nuclear transfer; and
- (2) a review of any technological developments that may require that technical changes be made to section 2 of this Act.

(b) Report.
